

# Intrauterine Insemination (IUI) Fertility Treatment at Mt. Graham OBGYN

## Kevin Bedford, DO, FACOOG, NCMP

A graduate of the University of Nevada, Las Vegas, Dr. Bedford earned his Doctor of Osteopathic Medicine from Western University of Health Sciences in Lebanon, Oregon. He completed his obstetrics and gynecology residency at Saint Joseph Mercy Oakland Hospital in Pontiac, Michigan.

## Our Fertility Services

### Intrauterine Insemination (IUI)

Intrauterine Fertilization, or IUI, is the main form of fertility treatment performed by Dr. Bedford. IUI, different from In Vitro Fertilization (IVF), involves placing sperm directly into the uterus to increase chance of pregnancy.

### Specialist Consultation

Scheduling a consultation is an essential first step to creating a fertility treatment plan and understanding your options for growing your family.

### Collaboration with Other Fertility Clinics

Dr. Bedford is able to work with other fertility clinics in assisting more specialized fertility treatments such as IVF. Routine appointments for cycle tracking and ultrasounds can be performed here in Safford and the results can be sent to the patient's provider at another facility. This helps alleviate travel and other costs for the patient in what may be an already stressful time.

For Referrals and Consultations call 928-424-4444

 2020 W. 16th St., Safford, AZ
